CANDLE VACUUM EXPERIMENT

What to do:

1. Stick the candle on the bowl by melting the wax at the bottom of the candle.
2. Add some food colouring to the glass of water and pour it onto the bowl
3. Light up the candle using the matchstick and put the empty glass over it.
4. When the candle goes off, you will see the water slowly getting sucked into the glass.

WARNING: Adult supervision is needed while lighting up the candle. Avoid having your child do it on their own.

Ingredients:

- 1 empty glass
- A bowl
- Food colour or waterproof paint
- Stirring Rod
- 1 glass of water
- Match sticks
