

THE SLIME RECIPE

5 Steps to Slime:

1. Pour 180ml of glue (typically 2 x 90ml glue bottles) in the bowl and mix with the food colouring or paint to give the slime whatever colour you like!
2. Add in the baking soda and the contact lens solution to the glue mixture and stir slowly.
3. The slime will begin to form immediately! Lift some of the solution with the spoon and see how the consistency has changed.
4. Stir as much as you can and then dig in and squeeze it with your hands
5. Add in ANYTHING you think will make YOUR slime special and the best ever. Now you should have the best slime in the wooooorld!!

Ingredients:

- 3/4 cup of white liquid glue.
- 1½ tablespoon of Contact Lens solution
- A tablespoon of baking soda
- A Spoon
- A bowl
- 2 drops of food coloring or waterproof paint (optional)
- Your additional twist!
