# MAKING COLOUR CHANGING FLOWERS

## What to do:

1. Pour about  $\frac{1}{2}$  a cup of water to each glass
2. Add a drop of food colour or waterproof paint to each glass of water
3. Trim at least half an inch of stem off the flowers before putting each into the glass
4. Wait about 8 - 12 hours to see the full results
5. The flowers change colour. Beautiful right?

## Materials:

- White flowers such as daisies or white roses
- Food coloring, make sure you have different colours
- 3 Clear Glasses
- Stirring Rod
- 500 ml of water in a jug
